

## Energy Sources

These energy resources were used to generate electricity for the PJM region, of which Energy Plus is a member, from April 2023 – March 2024.

Coal.....	14.8%
Gas.....	44.4%
Nuclear.....	33.4%
Oil.....	0.3%

### Renewable Energy:

<i>Captured Methane Gas.....</i>	<i>0.4%</i>
<i>Solar.....</i>	<i>1.5%</i>
<i>Solid Waste.....</i>	<i>0.5%</i>
<i>Hydroelectric.....</i>	<i>1.0%</i>
<i>Wind.....</i>	<i>3.5%</i>
<i>Wood or other Biomass.....</i>	<i>0.2%</i>

Total Renewable Energy.....	7.1%
-----------------------------	------

<b>Total Energy Resources.....</b>	<b><u>100.00%</u></b>
------------------------------------	-----------------------

## Air Emissions

Pounds Emitted per Megawatt-hour of Electricity Generated

Sulfur Dioxides (SO <sub>2</sub> ).....	0.322
Nitrogen Oxides (NO <sub>x</sub> ).....	0.253
Carbon Dioxide (CO <sub>2</sub> ).....	735.131

Energy Plus is a member of the PJM regional transmission organization, and the information on this notice includes regional energy sources and air emissions data, as calculated by PJM.

To obtain your next month's variable rate, you can call us at 1-877-580-3915 to obtain the price for an upcoming billing period starting 12 days before your current billing period ends. **MD Lic. # IR-1805.**
